

Report on World Ozone Day Celebration by Primary Boys of ADIS

World Ozone Day was observed with great enthusiasm by the Primary Boys of ADIS on **Tuesday, 16th September 2025**, to spread awareness about the importance of protecting the ozone layer. The celebration began during the homeroom period, where the students engaged in creative activities such as preparing placards, posters, and other visual displays carrying meaningful messages about the need to safeguard the environment.

Later, the students assembled on the school ground carrying their placards and colourful umbrellas. They raised thought-provoking slogans in unison, creating an atmosphere charged with awareness and responsibility. Their march symbolized the progression of awareness from the *micro level*—within the classroom—to the *macro level*—addressing the larger school and community.

The initiative not only engaged students in learning but also emphasized the collective duty of every individual in protecting the ozone layer for a sustainable future. The activity succeeded in instilling a sense of responsibility among the students while spreading an important environmental message.
