HOLD THAT DROP

P.O. Box 46492
Abu Dhabi, U.A.E.

Our team – Norah Susan, Fritzie Andrew, Megan Ann, Kimberly Fernandes, and Nandini Pandya with the Team Mentor Mrs. Priya S Balachandran proudly participated in the ADEK Hackathon, on the 17th November 2025, where we showcased our innovative project addressing energy awareness and sustainability. During the event, we had the privilege of presenting our solution to representatives from the **Department of Energy, Abu Dhabi**, and **ADEK**, who highly appreciated the clarity, creativity, and real-world relevance of our work.

The team was declared winners of the Hackathon, a recognition that reflects the dedication, teamwork, and strong problem-solving skills demonstrated throughout the competition. Additionally, the students were commended for their **outstanding outreach programme**, through which they engaged peers and promoted the "Drop the Watt" initiative with enthusiasm and responsibility.

Our efforts were further acknowledged through the **Outstanding Mentorship Award for** empowering future pioneers and **Achievement Award** to the students for their exceptional contribution and impact as Future Pioneers.
